

As a Los Angeles commuter, I need up to the minute traffic information to plan my route. As an XM Satellite Radio customer, I was very pleased to see a local traffic station included in their lineup. Not only do I enjoy commercial free music and news stations not available elsewhere, but traffic and weather are essential to the XM package. I pay for this service, and do not think the National Association of Broadcasters should have a say in programming. Please reject petition 04-160. Thank You.
